ESMO Courses in Medical Oncology for Medical Students

These courses, aimed at fourth and fifth-year medical students, provide an insight into medical oncology, enabling students to get a better picture of this interesting and challenging professional field, before selecting their specialisation.

esmo.org

“Five days in sunny Valencia have been an unforgettable experience. Saying goodbye felt much like leaving behind a cherished summer camp where you had fun and made new friendships. The lectures and workshops, led by passionate professionals deeply dedicated to their roles, made learning both informative and engaging. Furthermore, the exceptional organization of the course stood out as an additional highlight, contributing to a seamless and enriching educational journey. Thank you ESMO for supporting and motivating us at such an early stage of our careers!”

Taisya Volodina, Valencia 2023
Russian Federation

“I strongly recommend this course to everyone interested in treating or studying cancer. However, it is not only about empowering your medical knowledge. The course is a truly international experience, where you have the possibility to meet people from all over Europe, and to learn about different habits and different ways of studying medicine. Personally, I met lots of smart and dedicated people and we shared a great time together. I hope one day I will have the opportunity to work with some of them. It has been a wonderful experience all around and I am grateful to ESMO and to my mentors for giving me the opportunity to participate”.
